TO OUR VALUED CUSTOMER:

It is our sincere hope that this book will help you become more familiar with home medical equipment and supplies available to you. **Products shown are only a representation of the products available from the provider and may not be the exact item offered by your provider.** While every product listed in this book may not be available by your provider, the illustrations and information is a guide to help you choose the products best suited for your situation – whether you are the patient or the caregiver.

If you are confined to your room or a floor within your house, be sure to let us know. We can help you understand what products you may be qualified for.

Before contacting us, our contact information can be found on the back of this catalog, it will be easier and quicker to receive the help you need if you have the following information available.

- Type of insurance (Medicare, Medicaid, Private Company) if applicable.
- Insurance plan/group/policy number.
- Subscriber's identification number for Medicare, Medicaid, or Private (not government) Insurance Company.
- Patient's full name as it appears on the Medicare, Medicaid, or Private Insurance Company card.

We will need additional information based on your individual needs and circumstances. Always write down the name of the person who helped you. This will make it easier if you need additional assistance or more information.

If you have any questions regarding Medicare, you or your caregiver should go to the Medicare web site located at www.medicare.gov.

SAMPLE

CANES

From extra-stable Quad Canes to traditional styles, a wide variety of wooden and colorful metal canes are available with many styles of handgrips. Canes can be adjusted to fit your height.

CRUTCHES & ACCESSORIES

We can provide **Forearm** or standard **Axillary** style crutches. All styles are adjustable, lightweight aluminum. You can also order replacement pads and tips to keep your crutches comfortable and safe.

WALKERS

Lightweight, a folding walker allows it to fit through narrow spaces while maintaining rigidity and support and fold down completely for storage. The front wheels (5 inch) allow for a more natural walking stride and greater maneuverability. Side-Stepper and non-wheeled Walker styles are also available.

ROLLATOR/ROLLING WALKER

With a built-in seat and wheels on all four legs, the Rollator can convert from a walker, to a seat, to a transport chair when you get tired. With excellent maneuverability and the ability to lock the wheels in place for additional stability, the Rollator is the ideal walker.

WALKER ACCESSORIES

Wire Baskets - Sturdy designs that allows the user to transport items while using a walker.

Walker Pouches - A convenient way to carry small items while using a walker. Attaches easily to the walker.

Protective Balls - Prevent catching allows for greater maneuverability.

Contact us for additional options.

HOSPITAL BED WITH SIDE RAILS

For maximum comfort and functionality in your home. Fully functional electric models have a hand control that attaches to the rail allowing the head and foot operate independently. Multi-height and manual models are also available.

HOME BED RAILS

Designed to fit your bed at home, these rails can be added for protection or as a handy help up. Available in half and full-length sizes.

FITTED SHEET SETS

A fitted sheet designed specifically for a hospital bed makes it easier to make the bed and keeps the sheet in place - *no slipping!* Sheets are available in a variety of colors to brighten your room.

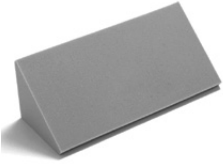

TENDER CARE HEAD AND FOOTBOARDS

Slip over head and footboards, easily transforms your existing standard home hospital bed into a beautiful piece of furniture. If the bed is no longer needed, simply take the rails off and you have a beautiful twin bed to enhance any decor.

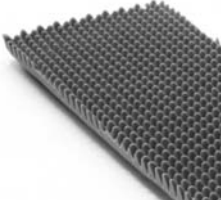

PROTECTIVE BED PADS

Available in both disposable and reusable styles. Protective pads help provide better patient care, allow for easier repositioning and helps protect bedding.

FOAM WEDGE

Available in a variety of sizes, foam wedges can be used in an ordinary bed or a hospital bed for added comfort and better positioning.

MATTRESS OVERLAY SURFACES

Mattress overlays are designed to increase circulation and reduce pressure by distributing body weight. They also offer additional support while increasing comfort for the patient. We can provide a range of surfaces, from foam egg crate styles to sophisticated air cell designs.

ALTERNATING PRESSURE PAD OVERLAY

This support surface constantly inflates and deflates alternate air cells to provide pressure relief for those who cannot reposition themselves in bed.

OVERBED TABLE

This table can be rolled into position over the bed to provide a stable flat surface for eating. The top can also be tilted for reading, writing or other activities.

TRAPEZE BAR

This trapeze bar is equipped with its own support frame for use over a standard home bed. Also available are trapeze bars that attach to the head of a hospital bed.

SEAT LIFT CHAIR

This style chair has a single switch hand control and a durable steel frame with a wide range of seat and back sizes.

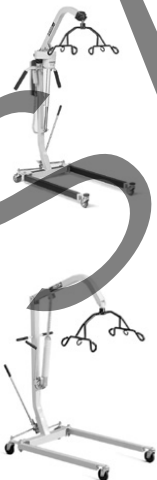

STAIR LIFT

This lift mounts on a track that is secured to the stairs. It can be operated with a hand control on the chair or by using button controls at the top and bottom of the stairway.

SCOOTER LIFT

This unit, powered by either a battery or wired directly to the vehicle, automatically lifts and lowers scooter and locks it in place.

BATTERY POWERED LIFT

Portable patient lift that has an adjustable “U” base, non-sway cradle. Can be operated from both sides.

HYDRAULIC PATIENT LIFT

The cradle of this lift is designed to allow use of either a U-sling or a classic-style sling. A simple and safe hydraulic lift.

WHEELCHAIRS & SCOOTERS

MANUAL WHEELCHAIRS

A wide range of manual wheel chairs and accessories can be designed to meet your exact needs! These include:

Transport Chairs - Lightweight & designed to fold compactly

Standard Chair - Designed to fold for travel with a sturdy frame, adjustable arms and choice of seat widths.

Elevating Leg Rests - For individuals with casts or a need to keep their legs elevated.

POWER WHEELCHAIRS

In addition to these standard models, customized chair solutions can be provided. **Lightweight Portable** - For indoor and some outdoor environments. Breaks down for easy transport. **Mid-Wheel Drive** - Indoor and outdoor use with excellent maneuverability and an 18" turn radius.

SCOOTERS

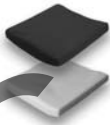

For patients that cannot operate a manual wheelchair, but still need help with mobility, there are several Scooter options.

Lightweight - 3-Wheels with a shorter turning radius.

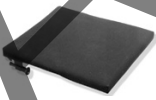

Four Wheeled - Sturdy, all purpose scooter. Max speed: 5.7 mph.

Full Sized - A cost-effective lightweight design with easy disassembly for transport.

CUSHIONS

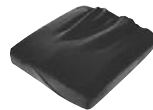

Standard Foam Cushion

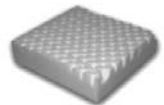

Solid Seat Insert

Air Floatation Cushion

**Positioning/
Pressure Relief
Cushion**

Eggcrate Cushion

The proper cushion or support surface can help in the prevention of pressure ulcers. Individuals with full sensation while sitting can use a simple foam cushion for comfort and long term hip stability. Others who have issues with pressure or lack of sensation should be using a cushion that helps to evenly distribute pressure and/or dissipate moisture. Some cushions are also designed to provide pelvic stability for better seating. We are here to help you to determine what type of cushion design has the best application for your needs.

WHEELCHAIR TRAY

Available in many different styles, a wheelchair tray attaches easily to the wheelchair armrest and provides a solid surface for working, eating or carrying items.

OXYGEN TANK CARRIER

This convenient accessory holds a portable oxygen tank on the back of a wheelchair.

BACK PACKS AND SEAT POUCHES

These accessories fit on the back of a wheelchair to provide a place to carry books, magazines, papers, or other personal belongings. There are many styles and colors available.

SEATBELTS

Available with either a Velcro or buckle closure, this strap helps keep you safely in the proper position in your wheelchair.

WHEELCHAIR RAMPS

Ramps designed to be used on thresholds, steps, vans or curbs for manual and/or power wheelchairs are available to meet your needs. **Track Style** ramps (shown) are available in 5 ft., 7 ft. and 10ft. lengths, with a non-skid driving surface.

**OXYGEN CONCENTRATORS**

Portable, Transfill and Standard concentrators filter out other gases and deliver oxygen to the patient at adjustable rates. Portable Concentrators are ideal for mobile patients and are approved by the FAA for use on commercial airlines. Home Transfill Concentrators can function as a standard oxygen concentrator and also has the ability to fill cylinders off the base unit for portability.

**CONSERVING DEVICE**

This device conserves oxygen by delivering oxygen only while you are inhaling. This extends the time of use for both oxygen cylinders and liquid oxygen containers.

**OXYGEN CYLINDER SYSTEMS**

Your doctor may prescribe the use of oxygen from either a large stationary cylinder or a small portable cylinder system. In either case, it will come with a regulator and possibly with a humidifier and appropriate base or stand. Extra cylinders, tubing, masks and cannulas are available to meet your needs.

**NEBULIZER WITH COMPRESSOR**

A nebulizer produces a very fine aerosol so medication and humidity can be breathed in the lungs. This nebulizer is lightweight with a reusable inlet filter.

A Transfilling Concentrator separates room air into oxygen and nitrogen. The nitrogen is discarded, while the oxygen is stored, concentrated and delivered to you or your cylinder at 91% to 95% purity. This, as well as ALL oxygen devices for the home must be prescribed by a Physician. If you are on oxygen, you should be sure to follow your doctor's instructions on usage.

PEAK FLOW & SPACER DEVICES

Peak flow meters and spacers for metered-dose inhalers. These simplify dosing and insures consistent treatment.

SUCTION EQUIPMENT

Intermittent suction machines are used to clear the breathing passages of fluids. These systems are available with tubing and other supplies.

SLEEP APNEA SYSTEMS

Standard CPAP, AutoCPAP and Bi-Level CPAP are all systems prescribed by a physician to treat individuals with sleep problems such as sleep apnea, snoring, unexplained interrupted sleep and excessive daytime drowsiness.

CPAP ACCESSORIES

We can provide you with a wide variety of masks, from the full-face style for a secure seal to the Nasal Pillow style, which is a quiet less-invasive and flexible design. Also available are humidifiers, tubing warmers, and CPAP pillows with indents designed to accommodate a mask and still provide comfort and support.

Sleep apnea increases the risk of high blood pressure, heart problems, and stroke. CPAP (Continuous Positive Airway Pressure) is utilized for the treatment of obstructive sleep apnea. The equipment delivers a flow of air at a prescribed amount of pressure that prevents the structures in your throat from blocking air movement in and out of your lungs while you sleep.

TRANSFER TUB BENCH

Designed to assist with transfers from a wheelchair into the tub or to aid in stepping safely over the side of the tub. Comfortable, secure bath seat with padded upholstery and adjustable aluminum frame, the Bench is also available unupadded.

BATH BENCHES

Bath bench with fixed or adjustable aluminum frame and molded seat and back. Non-back stool designs are also available.

HAND HELD SHOWER

Makes bathing while sitting on a bath bench or seat easier. It can also be mounted on the wall. No special plumbing is required.

GRAB BARS

With **Wall Mount** or **Tub Mount** styles. Grab bars provide increased safety to enter and exit the tub/shower or near the toilet. Available in chrome-plated or decorative colors and in a variety of sizes and shapes.

LONG SCRUB SPONGE

This two-sided sponge is on a long handle that allows use without raising the hand above the shoulder.

THREE-IN-ONE COMMODE

The Three-In-One commode can be modified to fit your over the bathroom toilet to provide a safety frame and raised toilet seat or it can be used as a bedside commode. This product is ideal for anyone who has difficulty getting to the bathroom. Standard bedside commodes are also available.

RAISED TOILET SEAT

Easily installed with a no-tools locking system. The extension raises seat height by approximately 5". Blow-Molded and Padded models are available. For additional security, you can order attaching arms.

TOILET FRAME

Designed to provide extra safety and assistance, the aluminum frame mounts onto toilet bowl with an adjustable bracket. Adjustable, the arms are designed for easy transfers.

WHEELED SHOWER CHAIR

This shower chair has a lightweight frame and a sturdy plastic toilet-type seat. Best used in a roll-in shower. Also fits over standard size toilets.

BATH LIFT

This battery operated lift raises the seat to the rim of the tub to allow for easy transfer. Easily installed in most standard tubs.

BED PANS & URINALS

Contoured bed pans and urinals for patients are available in a range of ergonomic designs.

DISPOSABLE BRIEFS

For mobility and protection even with severe incontinence, these briefs have soft leg gathers that provide a comfortable, secure fit. Sizes are available from Pediatric to adult.

OSTOMY SUPPLIES

A complete collection system for fecal diversion with a drainable pouch, odor barrier film, skin barrier, stationary flange and micro porous adhesive.

CATHETERIZATION KIT

Packed in as a single sterile kit, includes a drape, an underpad, plastic forceps, lubricant, specimen container and label. It also includes a pre-filled syringe with sterile water, PVP solution, five rayon balls, and pre-cuffed gloves.

LEG BAG

Made of lightweight, odor proof, heavy gauge material, these disposable leg bags fasten to the leg with straps that are included. Includes anti-reflux valve and empties from the bottom.

NUTRITIONAL CARE & MONITORS

BLOOD PRESSURE MONITORS

A monitor that has memory recall for 60 readings. Fully automatic with Fuzzy logic inflation and controlled deflation. Other models are available.

GLUCOSE MONITORING

Simple, easy to use Glucose monitors with easy-to-read prompts in English and Spanish. We can also provide you with the supplies you need to test your blood including lancets, strips, swabs, and syringes.

ENTERAL FEEDING PUMP

For individuals unable to consume food orally, a feeding pump controls the administration of enteral feeding. Also available, pump set (bags) and additional supplies.

ENTERAL FEEDING PRODUCTS

Enteral feeding products must be ordered by your physician. Your provider can help determine which system is best for your needs.

DIGITAL SCALES

Easy to read and accurate. Our high-quality scales have an 11" X 13" platform and a high-contrast LCD display.

OVER DOOR TRACTION

For cervical traction therapy, this system includes a foam padded head halter, pulleys, traction rope, notched adjustable spreader bar and vinyl weight bag.

HOT/COLD THERAPY

This dual function therapy allows patients to control swelling with cold therapy immediately after an injury and also help speed healing and relieve joint pain with the application of heat.

PARAFFIN BATH

Using moist heat to treat pain due to arthritis, chronic joint inflammation, stiffness and muscle spasms, a paraffin bath unit is thermostatically controlled to ensure just the right temperature. Operates on your standard household current.

TENS UNIT & ELECTRODES

This Transcutaneous electrical nerve Stimulator (TenS) helps control pain by means of electrical impulses through small electrodes attached to the skin. This is a noninvasive method, but does require a prescription. Your therapist or physician will assist you with electrode placement and rate settings.

MEDICATION AIDS

Pill splitters and crushers and other items are available to make taking medications easier and allow for a more correct dosage.

REACHER

A lightweight, trigger-operated reaching aid that makes it possible to pick up items that would otherwise be out of reach.

SOCK AID

An easy-to-use dressing aid to help those with limited movement put on socks.

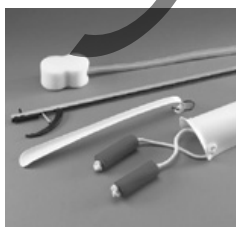

SHOEHORN/DRESSING AID

Use one end of this dual purpose dressing aid to help put on shoes and the push-pull "S" hook on the opposite end to help with dressing.

DISHES & UTENSILS

For those who have compromised movements due to surgery, joint conditions or other, we can offer a wide range of dishes, cups and utensils thoughtfully designed to provide comfortable solutions that allow for greater independence when eating and drinking.

JOINT REPLACEMENT KIT

This kit contains four household, dressing and bathing items to help a patient recovering from hip or knee replacement.

ORTHOTICS

An orthotic, while commonly associated with products for the feet, is any support, brace, or splint used to support, or correct moveable body parts. Orthotics are available in a wide range of sizes and styles and functions. Commonly ordered orthotics include:

Knee

Hinged Knee Braces • Patella Straps • Knee Sleeves

Hand & Wrist

Carpal Tunnel • Wrist Supports

Ankle & Foot

Ankle Lace up Sports Brace • Arch Supports • Night Splint (Plantar Fasciitis)
Support Stockings

Shoulder & Elbow

Elbow Sleeve • Elbow Strap (Tennis elbow) • Neoprene Shoulder Sleeve
Clavicle Straps

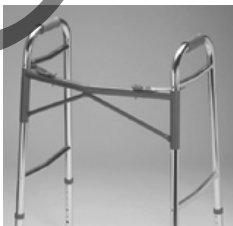

Back Support

Lumbar Back Braces • Back Support Belts • Abdominal Binders

HEAVY DUTY WHEELCHAIRS, WALKERS & COMMODES

Bariatric Patients needs may differ from other patients. In order to ensure both their safety and comfort, products are available that have been designed specifically for the bariatric patient's needs.

PEDDLE CYCLE

This cycle exerciser is good for home-based exercise because it clamps easily to chair legs or a wheelchair. Resistance can be adjusted.

EXERCISE BAND

Exercise bands allow you to exercise and progress accurately and confidently on your own. The bands come in a variety of lengths and are easy to use.

SQUEEZE BALL HAND EXERCISER

Arthritis sufferers can take this breathable foam polymer ball with them wherever they go to squeeze in helpful hand exercises.

PERSONAL WEIGHTS

Weight training is ideal for improving muscle tone and bone density. All are available in various weights. Dumbbells - A range of lightweight vinyl-coated dumbbells for improving arm and upper body strength. Weight Cuffs - These weight cuffs strap securely to your wrists or ankles.
